

Al Gurg Tower 3 Dubai, UAE

Client: Easa Saleh Al Gurg
Estate Division
Dubai, UAE

Scope: 50,000 m2 mixed use
building

Al Gurg Tower 3 is a 50,000 m2 high-quality, mixed-use development on the Dubai Creek, where Dubai's futuristic skyscrapers contrast with the traditional wooden dhows moored at the wharf.

The elegant glass office tower is curved in plan to maximize the panoramic views across the creek and provides 18 floors of prime office space.

The residential building's facade is a dynamic mix of solids and openings which compliments the office tower next to it. The residential portions of the tower includes 2-, 3- and 4-bedroom apartments and a penthouse with a rooftop pool, all with spectacular views over the creek and Dubai's skyline beyond.
