

Cleveland Clinic Abu Dhabi Hospital

Abu Dhabi, UAE

Client: Mubadala
Abu Dhabi, UAE

Scope: 360-490 Beds
4.8 million sq. ft. Hospital
Including Patient Tower,
Swing Wing and ICU Tower

An iconic architectural design located in the heart of Abu Dhabi on the Al Sowa Island. This state-of-the-art 364-bed hospital offers clinical care in conjunction with a 7-star experience for the citizens of Abu Dhabi as well as patients from abroad. The 4.8 million sq. ft. hospital project includes the patient tower, a “swing wing” and an ICU tower and will include digestive disease, eye, heart & vascular, neurological and respiratory units. The project design team implemented evidence based design concepts to provide for unprecedented levels of patient-centered care while integrating the latest building technology for sustainability and energy efficiency.

Key engineering features of the project included a double curtain wall system, a variable volume 100% Outside Air with Heat Recovery HVAC system, and a gray water and condensate water recovery system.

The project will be a Gold LEED Certified.
