

Kaiser Permanente Berkeley Medical Laboratories Berkeley, California

Client: Kaiser Foundation Health Plan, Inc.
Oakland, California

Scope: 35,000 sq. ft. Laboratories Expansion
40,000 sq. ft. Biomedical Engineering
30,000 sq. ft. Laboratory Remodel

The Kaiser Permanente Berkeley Regional Laboratories expansion program was comprised of bacteriology, histology, mycology, parasitology, serology, virology and sample processing departments.

The mechanical systems are designed for variable air volume fume hoods and room differential pressure controls. All-electronic control systems are utilized for energy management so that all airflow controls can be monitored and addressed from a central location.
