

National Energy & Water Research Center Abu Dhabi, UAE

Client: National Energy & Water
Research Center
Abu Dhabi, UAE

Scope: 249,300 sq. ft. Research and
Development Laboratory of
Renewal and Sustainable
Technology

The NEWRC project will be a sustainable and expandable laboratory facility that fosters a safe environment for researchers to carry out research and development activities that bring forth renewable and sustainable technologies for future generations. The NEWRC was established in 1999 to lead Abu Dhabi Water and Electricity Authority (ADWEA)'s effort to secure future energy and water supplies and quality for the UAE nation.

Current programs include research in thin film absorption and deposition, membrane desalination, eco-hydraulics and environmental studies.
