

Republic of Iraq – General Hospitals Maternity/Women Hospitals Iraq

Client: Republic of Iraq
Ministry of Health

Scope: Wasit - 260-Beds, 183,000sf.
Tamim - 260-Beds, 183,000sf.
Salah Al Dein - 260-Beds, 183,000sf.
Babylon - 400-Beds, 270,000sf.
Karkh - 200-Beds, 160,000sf.

The key design aspects of environment, way finding, operational efficiency, staff effectiveness and market focused image were enhanced through subdivision of the hospital into its primary elements: a multi- specialty outpatient medical center, a high technology diagnostic and treatment center, the critical care wing, the intermediate care wing, a rehabilitation and medical inn, and staff residences.

The hospitals located in Wasit, Tamim and Salah Al Dein will accommodate 260 beds in a 183,000 sq. ft. facility. The 270,000 sq. ft. hospital located at Babylon will provide 400 patient beds, while the 160,000 sq. ft. facility at Karkh will hold 200.

The Hospitals' HVAC system is 100% outside air with heat recovery.
